Release Notes
MediaBeacon R3volution, version 7.8   03/04/2016

Fixes

- **User Interface**

  - Fixes an issue where choosing email for an asset would not present a consistent experience.
  - Resolves an issue in which fullscreen video playback did not work on Safari.
  - Resolves an issue where the flyout menu on an asset in Tile View would not appear on iOS.
  - Fixes an issue in which a few Where clause criteria drop down options were not translated in the ACL settings page.

- **Preview Engine**

  - Corrects an issue in which the memory setting would revert to default upon closing the Remote Preview System.
  - Resolves an issue where Vantage was inhibited from enabling on the Remote Preview System.

- **Searching**
  Corrects an issue where searching with 'exact phrase' would not return expected results.

- **Flexibility**
  Fixes an issue in which assets through symlinks to a Windows volume with no drive letter were not imported into MediaBeacon.

- **Security**
  Resolves an issue where the Group ACL setting to disallow check out still allowed assets to be checked out.

- **Asset Links**
  Resolves an issue where linked images in older InDesign documents were not properly linked in MediaBeacon.

- **Mobile**
  Corrects an issue where the Selection sub-menu would not open on Android KitKat 4.4.

Other Products and Integrations

Please contact your MediaBeacon representative for more information on the following products and integrations.

- **MediaBeacon M4sterplan**
  M4sterPlan is secure Enterprise File Sync and Share for distributed teams with advanced metrics and administration.

- **3D Viewer**
  MediaBeacon's 3D Viewer enables users to seamlessly interact with packaging models without the need to install software, plugins, or having to download the model. This feature works on standard browser technology and extends the experience of interactive 3D viewing to everyone.

- **Vantage Integration**
  Vantage is a transcoding engine from Telestream that MediaBeacon can leverage to support a wide array of broadcast-quality codecs and video formats.

- **Aspera Integration**
  Aspera is a high-speed transfer protocol that can send files 10x – 100x faster than FTP or HTTP.

- **Tridion Integration**
  MediaBeacon is integrated with the Tridion global web content management system.
